

MACKENZIE LINDHOLM
(669) 333-4141 | lindholm04@gmail.com

EDUCATION

UNIVERSITY OF CALIFORNIA (UCLA)

Bachelor of Science: Statistics and Data Science

Los Angeles, CA

Exp. Grad 2026

Bachelor of Science: Cognitive Science, Specialization in Computing

Dean's Honor List

Relevant Coursework: Linear Algebra, Multivariable Calculus, Numerical & Computational Methods for Statistics(R), Monte Carlo Methods, Neural Networks, Programming in C++ and Python, Psychological Statistics

Activities: Kappa Kappa Gamma Sorority Executive Board Director, Intramural Sports, Community Volunteering

PROFESSIONAL EXPERIENCE

SIEMENS HEALTHINEERS (VARIAN)

Palo Alto, CA

Product Verification Engineering Intern

June – Sept. 2025

- Designed and executed automated test cases to validate software functionality, ensuring quality, safety, and reliability for medical device systems.
- Developed and implemented Python-based automation pipelines to validate system-level software outputs across large-scale testing environments.
- Executed test cases, analyzed results, and identified software defects, documenting findings to support debugging and corrective actions.
- Collaborated with cross-functional teams to coordinate testing efforts and resolve issues efficiently.

HARMAN INTERNATIONAL - UCLA Epicenter

Los Angeles, CA

Business Technology Consultant

April – June 2025

- Analyzed competitor marketing strategies using clustering algorithms and public datasets to identify market gaps and opportunities for competitive differentiation.
- Built and presented an end-to-end, client-facing data solution with automated API integration, clearly communicating technical architecture and business impact to executive stakeholders.

LANDIFY ECT

San Francisco, CA

Data Analytics Intern

June – Sept. 2024

- Deployed automated data pipelines processing large lab datasets to generate structured analytical outputs.
- Reduced manual reporting time by 10+ hours per week while improving data accuracy and reliability.
- Developed advanced statistical functions to filter and synthesize complex datasets into actionable insights.

ACADEMIC PROJECTS

Deep Learning Audio Classification

- Engineered high-dimensional audio features from the NSynth dataset to train and evaluate deep learning models for instrument classification.
- Built and evaluated end-to-end ML pipelines for model training and performance optimization; Conducted model evaluation and hyperparameter tuning to improve accuracy while reducing computational cost.

Overseas Drone Strike Analysis

- Analyzed political and drone strike datasets using statistical modeling and feature engineering to identify patterns in strike outcomes and communicate insights through visualizations.

TECHNICAL SKILLS

Programming: Python (NumPy, Pandas, Matplotlib), R, SQL, C++, Java

Tools: Microsoft Office Suite (Word, Excel, PowerPoint), G Suite, Figma, Tableau, Azure DevOps, PowerBI, Git

Skills: Feature Engineering, Predictive Modeling, Model Evaluation, Data Analysis & Reporting, Process Automation, Neural Networks, LLMs, System Validation, Logistic/Linear Regression, Visualization, Data Cleaning

Interests: Baking & Cooking, Skydiving, Crochet, Swimming, Hiking, Sewing, Graphic Design
